

R and B AlgoLabs

Building Explainable AI for High-Stakes Decisions

Why Now

As organizations increasingly adopt AI, explainability has become a competitive advantage—not just a technical feature. Leaders need to understand *why* decisions are recommended, not just accept an answer.

The Challenge

Most AI platforms generate answers.

Professional organizations need to understand why those answers were generated.

Whether evaluating a basketball player, pricing a prediction market, or analyzing an equity, organizations require intelligence that is transparent, auditable, and defensible—not black-box predictions.

Our Approach

Rather than replacing human judgment, our platforms provide the evidence behind every recommendation.

R and B AlgoLabs builds vertical AI intelligence platforms that transform complex historical data into **explainable, actionable intelligence**. Our products are designed for organizations that need to integrate AI into real-world decision making, where trust, transparency, and reproducibility matter as much as predictive performance.

Our Platforms

DBB2

Basketball Intelligence

Applications: NBA teams & front offices • Sportsbooks & player props • Prediction markets • Fantasy sports platforms • Sports media

Core capabilities: Historical player comparisons • Explainable projections • Monte Carlo simulations • Player archetype modeling • Enterprise APIs

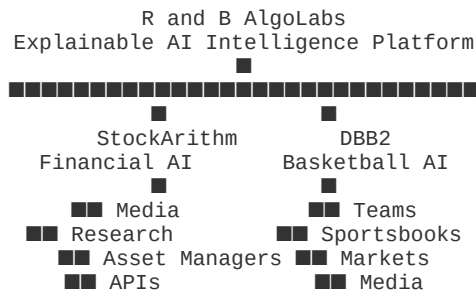

StockArithm

Financial Market Intelligence

Applications: Investment research • Financial media • Asset managers • Alternative data providers • AI-powered investment platforms

Core capabilities: Historical market analogs • Explainable market signals • Alternative data analysis • AI-generated financial research • Enterprise APIs

Platform Architecture

Who We Serve

Sports

- NBA Teams & Front Offices
- Sportsbooks & DFS Platforms
- Prediction Market Operators
- Sports Media & Journalists

Finance

- Investment Firms & Asset Managers
- Financial Media & Researchers
- Alternative Data Providers

Technology

- Enterprise API Partners
- AI-Powered Platforms

Let's Build Together

Strategic Partnerships

Integrate explainable intelligence into your products or workflows.

Pilot Programs

Validate our platforms with real users and production environments.

Introductions

Help us connect with leaders and decision makers across sports, finance, and AI.
